

Threat Management Toolset Support

Security Risk Advisors offers support for the following core solutions. We are not a reseller of security software, so we are independent and neutral to recommend best-fit controls, based on our experience implementing and operating them. Our strategic advice comes from a rounded perspective of working with leading companies to develop strategies and implement complex cybersecurity controls. We operate modern detection and threat hunting controls for global organizations in our 24x7 CyberSOC, which allows us to credibly relate to our most advanced clients.

Support Services

Advisory

Security Risk Advisors provides expert guidance based on our experience engineering and operating cybersecurity toolsets. In addition to general consulting services, we provide Product Selection services to assist you in choosing the right tools. We can also perform a toolset Health Check to ensure that your tools are optimized for maximum performance.

Engineering

Our Engineering services focus on the Deployment, Implementation, Configuration, and Tuning of any new products that you choose to integrate into your environment, as well as Functionality and Process Improvement of your existing tools. We configure detection policies and tune them on an ongoing basis to identify potentially malicious activity. We design and implement policies based on our templates, our security monitoring experience and your custom use cases.

Operation

We perform 24x7x365 monitoring of your environment using your existing toolset. Our team of Tier 1, 2, and 3 security incident analysts correlate and investigate potential incidents. We provide incident response expertise to execute remediation plans. We conduct Threat Hunts to identify anomalies and suspicious events which may be indicative of compromise. We provide a monthly Executive Summary Report and meet with your team to review recommended security hardening to help mitigate future attacks.
