

Improve your cyber program with a trusted advisor.

Why SRA

Our success together is driven by the trusted relationships we build. We work closely with our clients to improve their strategy and programs, assess controls and threats, implement and operate the best solutions based on their unique needs and business environments. Our approach to engagements emphasizes training and knowledge transfer to help clients sustain strengthened security management processes.

Differentiators

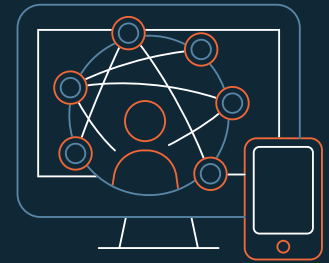

- **Recognized Thought Leadership**
We contribute to cybersecurity thought leadership conferences, including RSA, Gartner, ISC(2), FS-ISAC, NH-ISAC and other knowledge-sharing organizations. In 2017 we released a freeware reporting tool for measuring CyberSOC detection rates and improvement.
- **Independence**
We are not a reseller of security software, so we are independent and neutral to recommend best-fit controls, based on our experience implementing and operating them.
- **Diverse Client Base**
We focus on working with top market clients, but we also maintain broad perspective by working with innovating technology startups and mission-oriented non-profits.
