

Healthcare Cybersecurity Maturity Assessment

Security Risk Advisors' methodology is specifically tailored to the healthcare industry, drawing from our many years of experience working with payors, providers, and business associates. We bring together technical and governance expertise to look at the holistic posture of your organization across people, processes, and technology.

Objective

Leverage the Health Industry Cybersecurity Practices (HICP) and NIST Cyber Security Framework (CSF) to assess the maturity of the organization's cybersecurity controls.

Outcomes

- Identify controls and gaps in the control structure
- Recommend actions to enhance maturity of controls

High Level Approach

1

Interviews and Artifacts

SRA will conduct control walkthroughs relative to published maturity criteria with each control owner and operators.

2

Observations and Workshops

SRA will analyze and summarize results and our assessment of whether goals are met. We will lead workshops with larger groups to discuss and validate results.

3

Executive Reporting

SRA will lead a series of executive report readouts with the CTO, CIO, CISO and Cyber Operations Leads.

Differentiators

Recognized Thought Leadership

Security Risk Advisors contributes to cybersecurity thought leadership conferences, including RSA, Gartner, ISC(2), FS-ISAC, NH-ISAC and other knowledge-building organizations. In 2017 we released a cutting-edge freeware reporting and workflow tool for measuring CyberSOC detection rates and improvement.

Advisory, Engineering, and Operations Experience

Our strategic advice comes from a rounded perspective of working with leading companies to develop strategies and implement complex cybersecurity controls. We also operate modern detection and threat hunting controls for global organizations in our 24x7 CyberSOC, which allows us to credibly relate to our most advanced clients.

Independence

We are not a reseller of security software, so we are independent and neutral to recommend best-fit controls, based on our experience implementing and operating them.

Technical and Compliance Roots

Our strategy team leads have deep experience understanding both technical and compliance-oriented complexities of large organizations. We focus on working with top market clients, but we also maintain broad perspective by working with innovating technology start-ups and mission-oriented non-profits.
